Diese Datei ist lokal bei TeraPrint gespeichert und fuer den Kunden-Download vorbereitet.
Bitte bei Druckdaten immer die Massangaben und Beschnitt-/Sicherheitszonen der Originalvorlage beachten.
Bei Unsicherheit vor Bestellung oder Produktion TeraPrint kontaktieren.

SIGNAGAIN

no sign to waste.

Pitchdeck 2024

Introduction

The problem print waste

All prints are literally thrown away after a short or long period of use. Even materials that are recyclable are not being recycled, simply because the opportunities do not exist.

Click for video.

A game changer

We truly believe that we can create a 100% circular print & advertising industry together.

We are just starting, but our goal is to no longer buy and sell print once, but rather bring it into the loop and keep it there. Waste is no longer waste, but a resource. To give print an endless lease on life and transform in zero-waste circular products and materials.

If we keep innovating and pushing together the boundaries of what is possible in our industry, we can have a 100% circular print and advertising industry that is good for nature and society in 2035.

And only in this way print remains affordable and available and we are no longer dependent on increasingly scarce resources.

The solution on print waste

Sign Again is the first ever fully recycled rigid material, made from factory waste and used prints and is newly printable.
